

INFORMATION BULLETIN

No. M 462-RF/30b

REFERS TO: Fuel priming nozzles, Part No. M 462-RF-0410, and replacing them by the new type Yc-070 of fuel priming nozzles.

REASON: Since January 1, 1978 is fitted a new type Yc-070 of fuel priming nozzles in the M 462-RF aircraft engines, the technical parameters as well as the fitting-in method of which are the same. The asset of the new nozzle is economical.

When going to replace the priming nozzles, in any case it is necessary to replace at once all three nozzles, Part No. M 462-RF-0410, by three nozzles of the new type Yc-070, either of 0,34 MPa (3.4 at.g.p.) or of 0.36 MPa (3.6 at.g.p.) - according to the rated injection pressure indication on the surface of each nozzle.

TO BE CARRIED OUT: By the Commercial User.

COSTS: No extra costs will arise.

Prague, March 17, 1978.
