

SERVICE LETTER

No.: 0006 /2006

Concerning: All the subjects and organisations approved pursuant to the EASA regulation, PART – 145, or the CAA-TI-006-1/98 procedures for the maintenance of the aircraft in-line engines M 337, M 332, M 137, and M 132 of all versions and modifications, M 462 RF, and propellers V 341, V 541, and V 546, as well as all the subjects operating the above-mentioned engines and propellers of LOM and all the aviation administrations within the competence of which the operation of the above-mentioned engines and propellers falls.

Reason: The implementation of the operational provision of the change service information as for the above-mentioned engines and propellers on the web pages of LOM PRAHA s.p. with a view to speeding up informing the aviations administrations, maintenance organisations, and users of the above-mentioned engines and propellers about the change service documents.

Measures: For the reason given above, LOM PRAHA s.p. as the holder of the approved type certificates for the mentioned engines and propellers introduces the electronic access to the change service information on the web pages at www.lompraha.cz .

The information of the change service for the above-mentioned engines and propellers will in future be continuously published in the standard manner only on the web pages of LOM PRAHA s.p. in English and Czech in the “pdf “ or “doc“ formats in the following scope:

- Lists of bulletins in force,
- Lists of bulletins cancelled,
- Individual service letters concerning the operation,
- Individual bulletins concerning the operation,
- Explanatory notes to the lists of bulletins, and
- Additional service instructions.

The above-mentioned information concerning the operation of the engines and propellers is freely accessible at www.lompraha.cz in the full-text version; the freely accessible bulletins are identified in the list of bulletins in the column binding or informational by the letter “P” and the access to them is free of charge. In the English language lists, they are identified by the letter “M” (maintenance).

The bulletins concerning the general overhauls of the engines and propellers are identified in the lists in the column binding or information by the letters “GO”. They are

not freely accessible at www.lompraha.cz and their sending is performed individually on the basis of an order for a charge. In the English language lists, they are identified by the letter "O" (overhaul).

This measure avoids the registration of users for the change service and LOM PRAHA s.p. does not have to issue a document thereof.

Monitor regularly the most recent revisions of the service bulletins, service letters, and other information issued by LOM PRAHA s.p. with a view to obtaining the current information in the area of the operation and maintenance of the above-mentioned engines and propellers at www.lompraha.cz, in the "Bulletins" section.

Costs: None, the access to the web pages of LOM PRAHA s.p. is free of charge.

Effective date: Date of approval

In Prague, date: 15.5.2006
